Professional Summary

Dedicated and innovative software engineer with over 4 years of experience in designing, developing, and deploying user-centric web applications. Proficient in JavaScript, Ruby, Ruby on Rails, React.js, NextJS, Redux toolkit, ViteJS, and Tailwind CSS, with a strong focus on creating seamless user experiences within cloud-based environments. Adept at collaborating with cross-functional teams and contributing to solution design discussions to drive the success of SaaS products, as well as contributing to all stages of the development lifecycle. Committed to code quality, security, and continuous learning to achieve exceptional results.

Employment History

Frontend Engineer, ZeroComplex AI, Delaware, USA

11/2023 - Present

- Engineered a groundbreaking feature utilizing cutting-edge AI technologies that directly secured one of our product's: Church AI'S first paying customer. This feature enabled real-time personalized data exploration through interactive conversational AI, significantly enhancing the product's value proposition and attracting the initial customer.
- Spearheaded the optimization of the frontend engineering onboarding process, resulting in a seamless integration for new hires as well as developing a comprehensive documentation to ensure efficient knowledge transfer and rapid developer productivity.
- Leveraged strong communication and technical skills to collaborate with CTO and CPO, crafting the architectural vision, engineering culture and processes to ultimately translate business objectives into successful technical solutions.

Software Engineer, PAYSLICE, Lagos, Nigeria

01/2022 - 11/2023

- Collaborate closely with the admin team to identify software needs and translate them into functional requirements.
- Collaborated with the UX/UI team to implement design guidelines, contributing to an intuitive user interface.
- Utilize Ruby on Rails to create efficient, maintainable, and scalable back-end solutions, improving overall system performance.
- Contribute to code reviews, offering insightful feedback to maintain code quality and ensure best practices.
- Worked remotely with excellent self-management skills, maintaining open communication, and meeting deadlines effectively.

Software Developer, REVENT TECH, Lagos, Nigeria

08/2019 - 09/2021

- Introduced and maintained an internal UI library to develop product user interfaces.
- Played a key role in rebuilding the administrative system, streamlining customer and staff management processes on the Sterling Bank app, a core banking system using React, NextJs, Redux toolkit and TailwindCSS on the frontend and Ruby on Rails on the server side
- Implemented analytics tools for tracking production activities. This helped optimize response time for reproducing and fixing production bugs.

Mentor (Volunteer), Microverse, San Francisco, USA

03/2022 - Present

- Mentored junior web developers, providing technical support through code reviews.
- Proposed improvements to code organization to increase code quality and overall technical performance.

- Developed skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

Education

B.sc Computer Science, Lagos State University, Lagos, Nigeria

11/2016 - 05/2021

- Relevant coursework: Algorithms and Data Structures, Object-Oriented Programming, Software Engineering, Web Development, Database Management Systems, Operating Systems.
- Gained hands-on experience through internships, contributing to real-world software development projects.
